KING
in Radio

The KING IN RADIO line is complete.

A 5-tube style of receiver to suit the need and purse of every radio enthusiast. Two circuits—Neutrodyne and Tuned Radio Frequency—the two endorsed by eminent radio authorities as the leaders in design, and proven by popular demand to give unequalled results in service.

The tone is full and clear. The cabinets are of beautiful workmanship and design, in either walnut or mahogany. KING receivers are reliable, accurate, will give lasting service and are easy to operate. They are backed by the King organization which is noted for its precision products. King has never made anything which was "second rate".

Priced from \$85 to \$250

**Send Gardiner Back to
Ottawa**

ROBERT GARDINER.

ROBERT GARDINER, of Exalt, U.F.A. Candidate for Acadia, whose record as member for Medicine Hat in the last parliament is one of incessant effort on behalf of the farmers.

Robert Gardiner has at all times remained loyal to the democratic principles on which he was elected.

He has fought insistently and aggressively for the cause of the West.

We cannot afford to lose the services of such a representative.

**SEND GARDINER
BACK TO OTTAWA**

Considerable progress has been made during the past few years by R. M. Palmer, at Cowichan Bay, B.C., in the cultivation and propagation of new species of gladioli. In his garden, Mr. Palmer has at present growing about 150 different varieties, bulbs having been secured from all parts of the world, even Central Africa contributing its quota to this wonderful collection.

Having completed their tour of Canada as the guests of E. W. Beatty, chairman and president of the Canadian Pacific Railway, the ten British Journalists left Canada early in October for England, to relate there the story of their experiences and to give their readers the impressions they have gained of the Dominion.

During the month of August 1,392 vessels, comprising 131 trans-Atlantic, 35 coasting and 968 inland steamers, entered the port of Montreal, these having a total net registered tonnage of 1,295,045, while in the same period, 1,141 vessels went out, these representing 1,932,145 net registered tons. Since the opening of navigation 737 ocean-going vessels, representing 3,468,965 net tons, have entered the port, are compared with only 540, representing 2,280,072 net tons last year; these figures being up to the midnight of September 5th.

F. F. Norcross, a well-known Chicago lawyer, had an amazing experience recently while staying at the Banff Springs Hotel and playing on the golf course there. His opponent in the hole was disputed by a huge bull elk which tossed its antlers and stood pawing the ground with evident hostility as the lawyer prepared to play his ball. Mr. Norcross was about to observe the better part of valor when the bull's attention was distracted by the appearance of a cow elk which made an effective substitute for the golfer and both animals disappeared into the neighboring bush.

Travelling in a five-passenger 1925 improved model Ford touring car from Halifax to Vancouver, J. L. S. Scrymgeour and E. Flickinger are performing a feat unique in the annals of motor travel in this country. From Franz, near Seattle, B.C., they travelled on the tracks of the Algonia Railroad to Fort William, having been granted the use of the line by the Canadian Pacific Railway. The whole run of about 4,500 miles took nearly eight weeks, and a series of still and moving pictures were taken en route to commemorate the adventure.

Dial's Auction Sales

"Hello Bill" Comedy is Coming

"Hello Bill", which comes to Oyen Theatre, Thursday, October 22, comes backed with a reputation for provoking more laughs than any farce comedy written in recent years.

The production is new throughout—in lines and situations it is hard to recall an equivalent in this delightful and pleasing comedy success.

The Cobb Warren Gratias Amusement company, in association with Mr. Alfred Layne have left nothing to chance in marking this production as one of the outstanding theatrical events of the current season.

The cast includes such favorites as Miss Madalyn Gray, who was long associated with the Belasco forces in San Francisco. Miss Muriel Owen who startled the California city with her magnetic personality in the comedy success "Best People" and Mr. Don Austin, of the Duffy Players of the same city.

Beautiful scenic and electric effects, more than a laugh a minute, a cast of players each of individual fans will undoubtedly mark this attraction as one of the finest presented here in many a season.

ALPINE CLUB OF CANADA ENJOYS RECORD MEET

(Upper) Abbot Pass Hut and Glacier Peak. (Lower) Director Wheeler reading report at the annual meeting. (Inset) Mr. Wheeler, right, congratulating Capt. MacCarthy, who just returned from capturing Mount Logan.

"The camp this year was one of the best climbing of the party, were present. The business of the Club was transacted in the morning at ten o'clock under the large gey on the shores of Lake O'Hara. No meeting for the occasion—that of welcoming Capt. MacCarthy and his party—could have been more appropriate than amid the superb peaks that surround O'Hara. Flags of various nations were strung between the trees of this primeval forest in which the camp was pitched, this being the Club's own property, which Mr. Wheeler, its director, secured at far back as 1907. The scene was a festive one, the whole atmosphere, despite the severity of these majestic peaks and lake, was one of joviality and every one was in particularly good spirits.

Captain MacCarthy was elected a honorary member of the Club, not wholly on account of the Mount was recognized long before this as an outstanding mountain. Votes of thanks were extended to the Canadian Pacific Railway and various departments for the Swiss Guides and the mountain hut at Abbot, and the Mount Logan expedition and Henry S. Hall, one

PIERRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1937, by Doubleday, Page & Co.
"PIERRE, SON OF KAZAN," A VIKING ROMANCE WITH WULF, THE WAR GOD, IS AN ADAPTATION OF THIS STORY

SYNOPSIS
McTaggart, the post trader, finding Barre, the wolf-dog, trapped in one of his name snares, struck him a blow with a club. Then he bundled him into a sack and carried him to the cabin of Pierré, the trapper. Pierré, who was to demand the hand of Nepeese, the trapper's daughter, and who recognized Barre and when she saw he had been injured she turned in anger at McTaggart. Barre, finding himself, fastened his teeth in the trapper's leg. McTaggart, the post trader, however, but Nepeese raised the dog in her arms.

"Let us leave them to fight it out between themselves, m'lord," he said. "They are two little fire-brands, and we are not safe. It is a bit better—"

He shrugged his shoulders. A great roar had been lifted from these snarling. His voice was soft and persuasive. And now the anger had gone out of the Willow's face. A convulsive uplift of her eyes caught McTaggart, and she looked straight at him, half smiling, as she spoke to her father.

"I will join you soon, men per-vent and Melva the Factor from Lac Lachin."

There were no undeniable little devil in her eyes. McTaggart thought—little devils laughing full at him as she spoke, setting his brain aflame and his blood to running wild. Those eyes—half of dancing witches! How he would tame them and play with them—very soon now. He followed Pierré outside. In his exultation he no longer felt the smart of Barre's teeth. Half an hour later Nepeese came out of the cabin. She could see that Pierré and the Factor had been talking about something that had not been pleasant to her father. His face was strained. She caught in his eyes the reminder of fire which was his trying

ABLE TO DO HOUSEWORK NOW

Sick a Year. Got Great Benefit from Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham, N. B.—"I took Lydia E. Pinkham's Vegetable Compound for pains and backache, and nervousness, sick headaches and sleeplessness. I was troubled in this way for a year, and a friend told me about the Vegetable Compound and induced me to take it. I must say I have received great benefit from it and am able to do my housework now. I recommend the Vegetable Compound myself and am willing for you to use this letter as a testimonial."—Mrs. WILLIAM MORSE, Birmingham, Alabama.

Do you know that in recent years among women users of the Vegetable Compound over 220,000 replies were received. To the question, "Have you received benefit by taking this medicine?" 98 per cent. replied "Yes." This means that 98 per cent. of every 100 women are in better health because they have given this medicine a fair trial.

Mrs. Morse is simply another case of a woman receiving "great benefit." Women suffering from the troubles so common to their sex, and who do not know what other women who have accepted this time-saver and found relief. Give this compound a fair trial, and at once. It is sold at all drug stores.

pool between the rock walls, a pool so deep that it was like blue ink. She turned to face the Factor from Lac Lachin. He had never looked more like a red beast to her. Until this moment she had been doubtful, but now—in an instant—she terrified her. Before she could speak what she had planned to say, he was at her side, and had taken her face between his two great hands, his coarse fingers twining in the sixteen strands of her thick braids where they fell over her shoulders at the neck.

"Ka kakahet!" he cried passionately. "Pierré! said you would have an answer for me? But I need no answer now. You are mine! Mine!"

She gave a cry. It was a gasping, broken cry. Her arms were about her like hands of iron, crushing her slender body, shutting off her breath, turning the world about her head. She could not breathe, she could not cry out. She felt the hot passion of his lips on her face, heard his voice—and then came a moment's freedom, and air into her strangled lungs. Pierré was calling? He had come to the rock in the trail, and he was calling the Willow's name!

McTaggart's hot hand came over her mouth. "Don't answer," she heard him say. Strength—anger—bared flared up in her, and fiercely she struck the rock. Something in her hand, the cruel eyes held McTaggart. They blazed into his very soul.

"Beit noit!" she panted at him, freeing herself from the last touch of his hands. "Beit—black beast!" Her voice trembled, and her face flamed. "Beit noit! To show you my strength, and tell you what you wanted to hear—and you—have crushed me like a beast—like a great rock—"

She had not planned it like this. She had intended to be smiling, even laughing at this moment. But now McTaggart had spoiled them—her carefully made plans! And yet, as she pointed, the Factor from Lac Lachin had looked for an instant over the edge of the chasm. And then she laughed—laughed as she gave him a sudden slap. "And that is my answer, M'lord to Pierré from Lac Lachin!" she cried tauntingly, as he plunged headlong into the deep pool between the rock walls.

CHAPTER XIV.
From the edge of the open Pierré saw what had happened, and he gave a great gasp. He drew back among the balsams. This was not a moment for him to show himself. While his heart drummed like a hammer his face was white as paper.

On her hands and knees the Willow was peering over the edge. Bush McTaggart had disappeared. He had come down like the great clock was back; the water of her pool had closed over him with a little splash that was like a change of heart. He appeared now, beating with his arms and legs to keep himself afloat, while the Willow's voice came to him in taunting cries.

"Beit noit! Beit noit! Beit! Beit!"

She had small sticks and tufts of earth down at him fiercely; and McTaggart, looking up as he gained his equilibrium, saw her leaning so far over that she seemed back to fall, her long braids hung down into the chasm, gleaming in the sun; her eyes were fixed on him while her lips taunted him. He could see the dust of her white teeth.

"Beit! Beit!" He began swimming, still looking up at her. It was a hundred yards down, the slow-going current of the beach of shale where he could catch his breath, and a half of that distance she followed him, laughing and taunting him, and flinging down sticks and pebbles. He noted that none of the sticks or stones was large enough to hurt him. When at last his feet overtook her, she was gone.

Swiftly Nepeese ran back over the trail, and almost into Pierré's arms. She was panting and laughing when she came to him. "He has given him the answer. No-tawe! He is in the pool."

Nepeese was out of breath when she came to him. She had been tied to a table-top by a balding thug, heard her pause for a moment at the edge of the chasm, and then she came straight to him. During the half-hour of her absence Barre had scarcely moved.

Her touch thrilled him. It sent life throbs through his body, a tremulous quivering which she could feel while he was still in the water. His eyes. Greatly her hand stroked his head and his back. It seemed to Nepeese that he did not breathe. Under the curve of her hand his eyes closed, and another moment he was talking to him, and at the sound of her voice his eyes shot open.

(To be continued.)

WRIGLE'S SWEETENED TOBACCO

The Modern Locomotive

Older Type Gave Longer Service With Out Needing Repairs
It is a curious discovery that the greatest of the modern locomotive render less efficient service in some ways than those of simpler construction. In the twenty-five years ago the refinements and the greater hauling capacity have been attained at the expense of more frequent repairs and longer periods out of commission. The older type was available for service about seventy-five per cent. of the time; the newer for only forty per cent. So it often is with men. The two hundred and fifty men of the older type could be obtained for a wagon may have less endurance than the wily fellow of the string muscles and snail-shank neck—Yost's Companion.

C. C. Lumber For Atlantic Seaboard
During the past four years lumber shipments from British Columbia to the Atlantic seaboard have registered a steady increase, and it is expected that the total for 1937, according to date some 20,000,000 feet, will surpass last year's total, amounting to 168,000,000 feet.

DODD'S KIDNEY PILLS

After shaving—Minard's Liniment

A scientist is a man who can discover a fragment of ancient truth and tell how long the animal's jaw was.

In 1915 the United States used 45 per cent. of the world's supply of rubber. Last year the United States used 70 per cent. of the supply.

Minard's Liniment For Sore Back

Nurse Was Honored Guest

Only Woman in Canada Eligible For Membership in Amputees' Association

The only woman in Canada eligible to join the Amputees' Association, attended the annual convention of the association at Winnipeg.

Miss Jaffay, a volunteer nurse in the Canadian Expeditionary Force, later attached to the French army, and now a member of the nursing staff of the Christie Street Military Hospital, in Toronto, is the woman. She was one of the most honored guests at the convention.

Miss Jaffay joined the volunteer nursing corps in Toronto, in 1915, and served at the Base Hospital, in France until 1917, when she was transferred to the French army's mobile ambulance corps at Antwerp, Belgium. She lost her leg not when German bombers dropped a bomb between the huts at an advanced hospital.

Miss Jaffay holds the French Croix de Guerre and insignia on bronze, the former for valor and the latter for long service.

Flying School Builds Tunnel

Will Be Used To Test Lifting Power of Airplane Structures

The latest tunnel built in this country and perhaps in the world, as part of the new laboratory of the Danel Corporation, school of aeronautics of New York City, has been announced with the acceptance of the chairmanship of the advisory committee by William Wright.

The tunnel will be nine feet in diameter. An air velocity of more than 100 miles an hour will be attained in it and the tunnel will be used for model planes and also to test the lifting power of various airplane structures.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care of Every Young Mother

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come in many guises, and a mother must be on the watch for any sign of trouble. A mother's warning—the mother may have a very sick baby on her hands before she can be obtained. That is unless she has a remedy in the house which she can safely give to her baby for any of the many minor ailments of childhood and childhood.

Such a remedy is found in Baby's Own Tablets. These tablets are available throughout the country against any of the ailments of childhood. They are a safe remedy to be without an equal in the world of baby's ailments. Baby's Own Tablets to ward off illness. The tablets are sold by medicine dealers and are sent to any address. Each box, at 25 cents a box, by The Dr. Williams Medicine Co., Brockville, Ont.

Famous Man's Favorite Books

Four Out of Eleven Enjoyed By Steinmetz Were Written For Children

Dr. J. H. Steinmetz, the famous electrical engineer, was once asked what books he most enjoyed. Here is the list: "The Odyssey," "Faust," "Odes and Other Poems," "Homer," "Homer's 'Iliad,'" "The Jungle Book," "Treasure Island," "Darkness," "Tom Sawyer," "Huckleberry Finn," "Moby-Dick," "The Deluge." At least four of the eleven are children's books! Yet reading them helped to keep one powerful and useful mind alert to intricate problems—Collier's.

Canada's Century

Restricted Immigration Is Advocated For Dominion by English Writer

"This century will witness a development in Canada in all ways similar and equal to the development in the United States in the 19th century," writes the London Outlook declares, and he adds: "In the long run, provided that the present policy be maintained of encouraging the immigration only of the hardy races, Canada will produce a finer nation than the one in the making in the United States where a policy of indiscriminate admission of immigrants was pursued until recently."

At all times, or send 10 cents to Doctor Pierce's Laboratory in Bridgeport, Ont. for trial package.

CANCER

The petasium treatment which first presented by the late Dr. J. C. Pierce of England in 1917, has won the gratitude of countless cancer patients. It is a simple, safe, and effective treatment for all forms of cancer, and it is the only treatment that has been shown to be effective in the treatment of cancer.

THE CANCASSIUM TREATMENT
Experiments of many thousands confirm the great results achieved by the treatment. It is a simple, safe, and effective treatment for all forms of cancer, and it is the only treatment that has been shown to be effective in the treatment of cancer.

More Canadian Cattle For Britain
In the past six months, 17,700 Canadian cattle have been shipped to Britain, this being an increase of 100 per cent over the corresponding period of last year.

Notwithstanding the life of a paper dollar is only seven or eight months, we have never had one die on our hands.

Chas. M. Brush

"To build up a random constitution is to strengthen the nerves. I know of no better medicine than Dr. Pierce's Golden Medical Discovery," said Chas. M. Brush of 408 Carson Ave., Windsor, Ont. "I have been a sufferer from nervous indigestion, and my nerves were weaker. I did not have any more of nervous indigestion. 'Golden Medical Discovery' seemed to tone up my entire system, and I feel much improved physically."

At all times, or send 10 cents to Doctor Pierce's Laboratory in Bridgeport, Ont. for trial package.

The Greatest Problem Facing Farmers of Canada's That of Combating Wheat Stem Rust

"The next big problem facing cereals in Canada is that of combating wheat stem rust," stated Dr. Charles E. Saunders, former Dominion cereals and one of the leading plant breeders on the continent. "It is a matter of great importance and is not being adequately taken care of," he said.

The loss from this disease on the prairies is tremendous each year, and there is no method of combating it by chemicals or by cultivation. The only way to overcome the difficulty, he said, was to propagate a rust-resistant strain, which would at the same time have characteristics of high yield, early maturity and drought resistance.

Dr. Saunders pointed out that there are seven kinds of stem rust on the prairies. These are found in different districts, though each district may be attacked by several varieties of rust. To fully study the disease is to estimate the loss in wheat, it is necessary that many experimental stations be established throughout the three prairie provinces. Only by the breeding of a vast mass of money would the desired results be obtained.

The fungus cerealis is best known as the originator of "Midge" which is so popular on the prairies that more than eighty-five per cent. of the wheat there is of this variety. Dr. Saunders also mentioned the "Pride and Ruby" varieties which made possible the extending of the wheat belt several hundred miles farther north than it had been before.

The Dominion Government is at present introducing two other varieties propagated by the Dominion. These are known as "Grain and Reward." After extensive tests they have been found to be unusually frost-resistant and have been well adapted to cultivation in dry areas.

These will make possible the production of wheat in many areas where the prairie grower droughts are common. Dr. Saunders, though for twenty years primarily an agriculturist, is a student of French literature and also of music. Before entering the civil service he taught music, mostly vocal, and he has now returned to his musical avocations, retaining his position three years ago and for more than two years has been studying French literature in Paris.

Producing Clean Milk

Guarding Against All Sources of Contamination in Milking Process. A clean calf, a covered stall and a clean animal are the first requisites for producing clean milk. All other sources of contamination are of lesser importance, states the Dominion agricultural, bacteriologist in his report for 1924. To insure clean milk the stalls should be washed and scoured, and, if possible, treated with disinfectant and care taken to have no dirt fall from the cow into the milk. The report, which is distributed free by the Dominion branch, describes in detail the methods of insuring complete cleanliness. Manure and dirt are the chief sources of contamination, and the cow's hands must be carefully washed, and the foremilk should be discarded.

Oil Pollutes Sea

Fishermen. It is said to decline in the productivity of many sea fishing grounds is due to the pollution of oil. In the latest report, the fisheries department states that its scientific investigations "do not indicate that oil is actually injurious to the life of any fish species." It is, however, the pollution of the sea with waste oil is killing large numbers of sea birds—London Sunday Herald.

Canadian Bond Sales

Canadian bond sales for the present year up to September 19, amounted to \$41,537,311, as compared with \$308,611,267 in the corresponding period of 1923. The sales for this year to date were disposed of as follows: Canada, \$19,162,978; United States, \$182,745,099; and Great Britain, \$27,978,232.

The only difference between mid-day and investigating is that we always investigate and the other fellow meddles.

The "diamond beetle" of Venezuela is the largest insect in the world. A full-grown one weighs about half a pound.

One minute after grain is eaten by a cow the flavor is present in the milk.

British Journalists Impress Trip Across Canada Was One of Great Interest

At the conclusion of their tour through Canada from the Atlantic to the Pacific as the guests of E. W. Heston, president of the Canadian Pacific Railway, a party of ten British journalists have returned to the press just before sailing for England at the end of September summarizing their impressions of Canada. It is evident from these statements that each editor has been very favorably impressed with what he saw in the Dominion and the good opportunities there are for prospective settlers. The journalists in the party were: John A. Hilt, Glasgow Herald; Hugh Martin, London Daily News; W. D. Repton, London Daily Chronicle; H. A. Reid, South Wales News; Cardiff; James P. Cagney, Westminster Gazette, London; Charles J. Joy, London Daily Telegraph; H. A. Colville, Eastern Morning News, Plymouth; John Sayers, Belfast Telegraph; P. G. R. Petersen, The Times, London; Capt. E. Altham, C.B., R.N., Morning Post, London.

Canadian Butter On British Market

Canadian Product Gradually Gaining A Firmer Footing in Britain. Satisfaction with this year's quality and improved grades has been expressed by British buyers. The quality of butter is expressed by prominent importers of British, one of the most important distributing centers of Canadian butter is the United Kingdom, according to advice received by the department of trade and commerce from British representatives there. The report adds that if Canada keep on shipping good fresh butter, in time it will have an effect on the English market and to the detriment of other sources of supply.

B. C. Whaling Industry

Steam Whalers on Pacific Coast Have Had A Good Season. A total of 275 whale harpoon boats during the past summer by the steam whalers operated by the Consolidated Whaling Corporation of British Columbia. This is a considerable improvement in this industry there for the past few years. There is now a considerable demand for whale oil and by-products, as well as for the cleaned whale meat, which is sold for a delicacy by the natives of West Africa.

Here Is A Paradox

British whalers are best in a motto that is being stamped on mail matter in the postal machines of the country, but the stamping is being done by machines that are not British made. No such machines are made by any British firm.

LOADING TWO GRAIN CARS A MINUTE IN RECORD CANADIAN NATIONAL MOVE

Engines were just twice those of 1924, while the loadings were larger by 1,537 cars, or 425,000 bushels. A record week was also experienced at the lakehead, where 4,118 cars of grain were unloaded and 60 boats, carrying 12,292,000 bushels, were cleared for eastern markets. During the same week last year only 2,598 cars were unloaded and 29 boats, carrying 5,068,000 bushels, were cleared.

Canadian National loadings for the week by provinces were: 2,486,000 bushels in Manitoba; 1,571,000 bushels in Alberta; making a total of 10,175,000 bushels, or 8,580 cars, for the period. Rankings at CN points were: 4,117,000 bushels, Manitoba; 1,111,000 bushels, Saskatchewan; 2,220,000 bushels, Alberta; total, 7,558,000 bushels. This leave in store at midnight Thursday in country elevators in the three provinces in the order given above: 2,649,000, 12,735,000 and 1,571,000 bushels, a total of 17,955,000 bushels in storage as compared with 6,575,000 bushels at the same date last year.

The movement was speeding up also, as threatening progresses in the western districts, 417 cars having arrived at Vancouver during August and September. This is just 201 cars more than during the same two months last year.

The heaviest week of the season by four million bushels in grain marketings during the month were 52,269 bushels against the previous high mark of 28,700,000 made in September, 1923. Loadings were 52,269 bushels and 27,217,000 bushels during the month compared with 22,568 cars and 28,473,000 bushels in September, 1922. Total loadings on Canadian National line to the end of September this year were 29,284 cars and 39,038,000 bushels, against

Meat and Bone By-Products

Constitute A Valuable Source of Protein and Bone-Making Material. The Dominion chemist, Dr. F. T. Shurt, and his assistant, Miss S. N. Hamilton, have prepared and the Dominion department of agriculture has published, a fourteen-page bulletin describing what is meant by "Meat and Bone By-products" and designed to furnish that knowledge of their composition and nature that is essential to their economic purchase and use. The feeding stuffs on the market that come from the foregoing leading includes meat and blood meals, tannage, bone meal, fish meals and other related materials, mainly the by-products of the packing house, slaughter house and fish canneries, and consist of varying proportions of meat, fatty tissue, blood and bone, according to their source and method of preparation. As a class, states the bulletin, they are highly nutritious and phosphoric equivalents that constitute a valuable source of protein and bone-making material and are especially useful in the feeding of swine and poultry. It is essential that they should be prepared from fresh materials and as purchased should be sweet and sound, free from rancidity and mould. As a consequence, continues the bulletin, which can be had on application to the public relations branch, Ottawa, it is obvious that these feeding stuffs should be purchased always on guaranteed analysis, and that the quality of the product, the results of which are established in this bulletin, was the establishment of standards, in percentages of moisture, fat and protein, for the various classes of products under consideration.

Manufacturing Industry

Statistics Compiled Showing Returns From Manufacturing In Each Province. Manufacturing establishments to the number of 2,642 were in operation in Canada in 1923, as compared with 2,541 in the previous year, according to a bulletin issued by the bureau of statistics. The gross value of production in 1923 was \$278,146,514, an increase over the previous year of 12.37 per cent. This was divided, by provinces as follows: Ontario, \$145,381,248; Quebec, \$81,101,000; Nova Scotia, \$18,181,848; New Brunswick, \$7,011,000; Quebec, \$81,101,000; Ontario, \$145,381,248; Manitoba, \$27,848,000; Saskatchewan, \$21,337,831; Alberta, \$54,257,201; and British Columbia and the Yukon, \$19,066,962.

Ship 4,000,000 Lbs. Butter

The Saskatchewan Co-operative Creameries this year have shipped to England more than 4,000,000 pounds of butter, says A. P. MacLean, general manager. The Saskatchewan Co-operative Creameries this year have shipped to England more than 4,000,000 pounds of butter, says A. P. MacLean, general manager.

Secret of Stabilized Population Of The Prairies Is Closely Identified With Tree Planting

Dairy Product Act and Regulations Amendments to the Dairy Product Act

The text of The Dairy Product Act as amended this year and regulations under the act have been published by the department of agriculture, at Ottawa in uniform style with other acts relating to agriculture. There is a new amendment to the act authorizing the governor-in-council to make regulations that will enable the dairy producer to refuse to grade any dairy produce and to withhold grade certificates. Sections 24 to 26 inclusive have been added to the previous 23 of the regulations. These provide that any butter cut or moulded into prints or blocks shall be deemed to be not graded, and that no person shall brand, mark, describe or advertise for sale as graded, butter which shall have been so cut or moulded; that a trader's certificate covering any such butter shall be deemed cancelled; that no person shall pack butter in a package bearing marks of previous grading, but that no person shall sell, offer for sale or have in his possession butter branded, marked, described or advertised as graded, unless the person has a certificate covering the same, and that any butter on which no label had appeared, whether on the butter itself or on the packaging lining, even though all traces have been removed, shall be classified as "no grade."

Ships 4,000,000 Lbs. Butter

The Saskatchewan Co-operative Creameries this year have shipped to England more than 4,000,000 pounds of butter, says A. P. MacLean, general manager. The Saskatchewan Co-operative Creameries this year have shipped to England more than 4,000,000 pounds of butter, says A. P. MacLean, general manager.

"In more than 7,000 miles" of travel by the tree planting car of the Canadian Forestry Association this year we have yet to encounter a single farmer who has migrated from a well-farmed farm. The secret of stabilized population in this country is closely identified with tree planting. Even in excessively dry districts, where irrigation was scarce, the farmer with shelter belt of trees managed to make a better living, and certainly had no thought of quitting."

This statement was made in an informal way by Angus G. Jacob, who returned after a season's work as assistant on the tree planting lecture car of the Canadian Forestry Association.

With 7,677 miles of prairie railway travelled this season, and audiences totaling 42,000, the tree planting car has made 146 communities, the tree planting car of the association is looking for more business in the future. On conclusion of this, the sixth annual tour of the car, the officials in charge report that as a consequence of present situation of the western wheat, tree planting was being held at as no previous period. Already 80,000 trees have been planted by 15,000 farmers and school children, with incalculably great benefits in larger production and more contented farmers.

The early belief that trees could not be successfully grown on the prairies has been thoroughly disproven by the results obtained by the forestry branch of the department of interior during the past 25 years in distributing free to farmers and others who have been promoting forest growth trees, seedlings and cuttings for planting on their property, either as windbreaks or for ornamental purposes. An idea of the extent of this work may be deduced from the fact that during the past shipping season, which extended from April 1 to May 1, 2,470,000 seedlings, cuttings and transplants were sent out from Indian Head to 199 farmers and 2,500,000 were distributed from Saskatchewan to 1,019 farmers.

Dress Turkeys Before Shipping

Whenever Possible Turkey Should Be Sent to Market In This Manner. Writing of the successful pool of buyers in Saskatchewan last year, Acting Commissioner Waldron states that shippers through the turkey turkeys that are well placed with results as were those who shipped the farm-dressed birds. Mr. A. G. Taylor, in his bulletin on "Turkeys and Their Management" published by the Dominion department of agriculture, advises that whenever possible turkeys should be sent to market dressed. He also states that turkeys should be dressed in the morning and should be stored during twenty-four hours and during that time given all the rest of the day which will be in cleaning the intestines and also improves the flavor of the flesh. Dressing birds, Mr. Taylor adds, should be thoroughly plucked before packing. Cars should be taken to arrange them firmly in the packing cases to prevent moving while in transit.

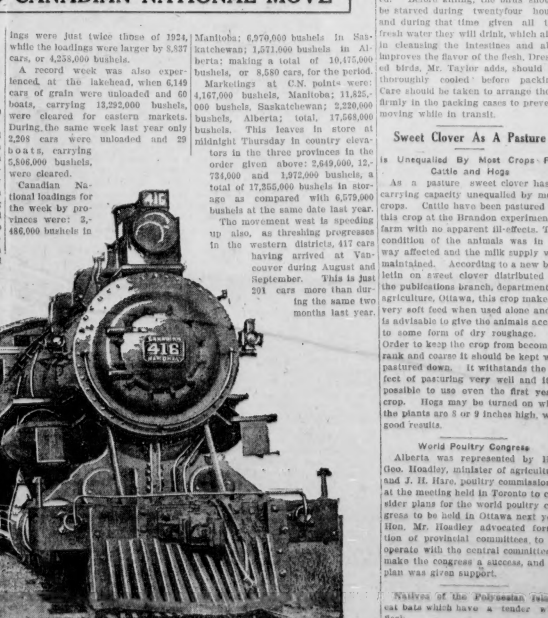

Sweet Clover As A Pasture

Is Unequaled By Most Crops For Cattle and Hogs. As a pasture sweet clover has a carrying capacity unequaled by most crops. Cattle have been pastured on this crop at the Brandon experimental farm with no apparent ill-effects. The conditions of the cattle have been as good as those who have been pastured on any other crop. According to a new bulletin on sweet clover distributed by the public relations branch, department of agriculture, Ottawa, this crop makes a very soft feed when used alone and it is advisable to give the animals access to some form of dry roughage. In order to keep the crop from becoming rank and coarse it should be kept well pastured down. It withstands the effects of mowing very well and it is possible to use even the first year's crop. Hogs may be turned on when the plants are 5 or 6 inches high, with good results.

World Poultry Congress

Alberta was represented by Hon. Geo. Howley, minister of agriculture, and J. H. Hare, poultry commissioner, at the meeting held in Toronto to consider plans for the world poultry congress to be held in Ottawa next year. Hon. Mr. Howley advanced the idea of this provincial committee to co-operate with the central committee to make the congress a success, and the plan was given support.

Native of the Polynesian islands eat bats which have a tender white flesh.

WORLD HAPPENINGS
BRIEFLY TOLD

Silk valued at \$250,000 was stolen from a building in Madison Square, New York, by four robbers, who left the watchman handcuffed and gagged.

Banking interests of Northern Italy are negotiating for the purchase of 40,000 acres of farm lands in Manitoba, on which it is planned to settle Italian families.

"In my opinion the Indian uses less drugs in his daily life than the Englishman, Canadian or American," declares Warden Miller, Kirkcaldy, British parliamentary member.

The mystery surrounding the destruction of buildings at the rectory of Les Peres, St. Joseph's, St. Anne des Chenes, Man., was solved when a 200-pound black bear was shot and killed in the act of robbing a hive.

Western ranchers and farmers will stop raising cattle unless the discrimination against them in shipping for export is removed, declares Dr. H. Russell Ormiston, Winnipeg, of the Dominion department of agriculture.

Leon Trelohy, his health undermined by his strenuous work on the economic tasks assigned him on his return to Moscow five months ago, has been compelled again to relinquish active participation in the revolution.

Great Britain and Ireland reported a decrease of 8,000 gross tons in ship construction for the past three months, while the total world output was 150,000 gross tons. Germany showed the greatest drop, losing 10,000 tons.

Italy and Holland each produced 150,000 gross tons. The United States has become rich beyond his dreams. It has sold a huge sugar tree for the first time. The Austrian market has been valued at \$2,000. The value of the tree farmed in its marble-like veins and cross-color patches.

Several hundred budgets these days are subject to the same economic laws as those of lumber individuals, and Queen Wilhelmina has found it necessary to notify all her employees that their salaries will be cut by 10 per cent. as from January 1 next.

A long standing superstition that a house failure any day will produce on the stage the life of Edgar Allan Poe, was strengthened when J. W. Hayes, manager of the theatre, has given a play that that nature has just played a failure, died of pneumonia.

The wharf at Sydney, on the Charlotte Island, B.C., and the entire salt-carrying plant of the Imperial Trading Company, a Japanese concern, collapsed last week, was precipitated by a heavy, impelling many lives and causing less estimated at many thousands of dollars.

Complete removal of the sales tax in Canada will be one of the subjects brought forward for discussion at the annual conference of the Canadian Board of Trade which will be held in Winnipeg this winter. It was announced following a meeting of the council of the Vancouver, B.C., board.

Flying Boat Will Be Huge

Machine of Future Will Also Attain Great Speed

The flying-boat of the future, carrying 100 passengers at a speed of 100 knots, was described at a meeting of the British Association by Oliver Simmons.

He told the engineering section that this plant vessel, built with two decks, would make non-stop flights of 1,000 miles, or cross the Atlantic with one stop in thirty-six hours.

Such a commercial machine would probably have an all-steel monoplan body of some 6,000 square feet wing area and 25 ft. span. The power units would be housed in an engine room built into the thick wing, some 20 ft. from the hull.

From each room, at full revolution would be some 2,000 horsepower. The hull would be arranged in two decks to provide spacious accommodation for a hundred passengers. The speed would exceed 100 knots, and the vessel would undertake flights up to 1,000 miles without refueling.

By slightly reducing the number of passengers, such a boat could fly from Europe to America in less than 24 hours at the Azores, and accomplish the whole flight within 36 hours.

An airplane, printed in 1643, was the first book in Norway.

A Grateful Tourist

American Tourist Has Pleasant Recollections of Trip in Canada

As the tourist business is the nation's business and as the Canadian people, as Canada, they will be glad to know that the natural resources and intelligence service of the department of the interior has received many letters of gratitude from tourists who have visited Canada the past summer.

Herewith are two letters which, while they were sent to the above branch, really testify to the Canadian people. Names will not be mentioned, but the letters are too good to be just buried in files.

Early in August an American tourist wrote:

"I am leaving here on Monday, August 24th and have ever since I came from Detroit to Quebec. Then, if roads were good, up into that country, on Route 100, and down to Fredericton, in New Brunswick, St. John N.B. Could you suggest any way particularly for me to go and find better roads?"

"I thank you for any help you may be able to give me, and for your trouble in this."

The natural resources intelligence service supplied the writer with a detailed route, which was evidently satisfactory, if one may judge by the next letter.

"We have just returned from what has been one of the most interesting and profitable trips I have ever had. I want to thank you for your aid in planning our trip, and the very clear maps you so kindly sent me."

On the subject let me compliment the different provinces of Canada on the good condition and upkeep of their roads. Also the evidence all along our touring route, of continued improvements to these roads.

We will hold very pleasant memories of our trip, due to the many courtesies of your government and the people we met in Canada."

It is to be noted that tourists are received by these visitors along their route that make friends, and Canada and the Canadian people cannot have too many friends.

Learning His Responsibility

Young Duke of Norfolk Will Be Worthy of Title

It is the youthful Duke of Norfolk, who American visitors have given the title of "The Poor Little Rich Boy." They cannot understand why a youth of 17, who has inherited property valued at tens of millions sterling, should be kept in an ordinary house, instead of a castle, and should be provided with a school in his recreation. The seventeen-year-old son of an American millionaire would probably have everything his heart desired. In Britain, however, the holder of an ancient title is brought up to a sense of the responsibility of his position, and the Duke of Norfolk is, very wisely, training him in a way that will ensure that he shall be worthy of his honored title, and the honor of the title itself will be carefully conserved until he comes of age—Glasgow Herald.

Flying Boat Will Be Huge

Machine of Future Will Also Attain Great Speed

The flying-boat of the future, carrying 100 passengers at a speed of 100 knots, was described at a meeting of the British Association by Oliver Simmons.

He told the engineering section that this plant vessel, built with two decks, would make non-stop flights of 1,000 miles, or cross the Atlantic with one stop in thirty-six hours.

Such a commercial machine would probably have an all-steel monoplan body of some 6,000 square feet wing area and 25 ft. span. The power units would be housed in an engine room built into the thick wing, some 20 ft. from the hull.

From each room, at full revolution would be some 2,000 horsepower. The hull would be arranged in two decks to provide spacious accommodation for a hundred passengers. The speed would exceed 100 knots, and the vessel would undertake flights up to 1,000 miles without refueling.

By slightly reducing the number of passengers, such a boat could fly from Europe to America in less than 24 hours at the Azores, and accomplish the whole flight within 36 hours.

by Haul-Clay

Girl's Attractive Suspender Skirt and Blouse

A charming frock featuring the latest fashions in the skirt and blouse is bound to be a favorite with girls. Individually in taste may be expressed by having the skirt of one color material, and the blouse of another, thus harmonizing color. Many mothers have short skirts of material. In the sewing room, and this model offers an excellent opportunity to use the accompanying diagram, give a very clear outline of the frock, and a chart with full directions is included with the pattern. Sizes 8, 10, 12 and 14 years. Send your order to the publisher of 26-half pattern for the jumper, and 14 yards for the blouse. Price 25 cents.

Home sewing brings nice clothes within the reach of all, and in the modern era it is delightful when it can be done so easily and economically by following the styles shown in our new Fashion Book. A chart accompanying each style shows the material as it appears when cut. Every detail is explained so that the inexperienced sewer can make up a very attractive dress. Price of the book 10 cents in copy.

Money Pours In

Plenty of Funds to Restore St. Paul's Cathedral

Thanks to a large response from all parts of the world, which resulted in contributions continuing long after the fund had officially closed, the fund for restoration of St. Paul's Cathedral has now reached the high mark of a quarter of a million sterling.

The Times announced, for weeks past a small but persistent stream of contributions to the fund for the preservation of St. Paul's has continued, and at the end of August the grand total of subscriptions received since the appeal was launched in January amounts to a quarter of a million pounds.

A quarter of a million is nearly twice as much as the Dean and Chapter found it their duty to ask for at the beginning of the year; for their consultation of experts, who had taken over three years to consider the problem, put the required amount at £120,000 to £140,000. The appeal had not been before the public longer than a fortnight when St. Paul's Day, the fund had handsomely exceeded the greater of these two sums. It was evident, therefore, that the crowd was in response to the appeal would certainly not be the last in which money would be collected, and from then until now contributions have flowed in.

Wheat Pool in Alberta

The Alberta Wheat Pool is making a drive for another 1,000,000 acres. It already has 32,000 members representing more than 5,000,000 acres of wheat crop. It will take 10,000 more members.

Sheffield Plate

The so-called Sheffield Plate, an imitation of silver made by pressing or "seeding" a thin skin of silver on to copper, was first made in England in the reign of George III.

Increased Traffic
Through Suez Canal

Growth of Shipping Compels Continual Enlarging of Waterway

Unlike the Panama Canal, the Suez Canal has no locks. As first constructed, the canal had a depth of 26 feet. Later, this was increased to 36 feet; and work now in hand, when finished, will insure an average depth of not less than 40 feet. The canal is now passing through the canal draw maximum of 31 feet, and craft having a draft of 33 feet will use the waterway before long. In short, the growth of shipping compels the continual amplifying of the canal's dimensions so as to provide suitable lowways for the safe movement of the great tide of traffic.

Originally, the bottom width of the canal was 72 ft. while at present it is 150 feet. The intention is to augment this to 300 feet. Today, the surface width of the canal varies from 210 feet to 325 at some points. The minimum width is to be increased to 400 feet. Formerly, it was not possible for ships of more than 1,000 tons to traverse the canal, but now vessels of 20,000 tons can make the run.

The trip through the canal takes 16 hours, 14 of which are spent in progress. About 15 ships go through the canal every twenty-four hours; the rest of the navigation is supervised by expert pilots. In 1870, 1,000 tons of vessels using the canal was 458, representing a total of 436,609 net tons. Since that time, the tonnage has entered the canal, and these vessels had a registered capacity of 20,033,881 net tonnage. Naturally, traffic was interrupted during the World War. Recovery has been hampered, but the latest figures available—those for 1923—show that 452,471 tons used the canal, with a net tonnage of 22,730,162.

Refused To Don
Distinguishing Clents

Head of Berlin's Exclusive Fashion House Is Bankrupt

Charles von Drell, head of Berlin's most exclusive fashion house, refused to don clients, his firm has been closed, and he is going to the United States. Von Drell's designed gowns and trousseaus for practically all the German Princesses, and when the German Herald started the World War, he had to flee to Berlin. He had to leave his wife and children, and his clothes made.

Germany's upper 400 were quite as much in the clutches of the head of the firm as by the creations of his staff, for Baron Christof always dressed upon personally waiting on all distinguished customers and putting the finishing touches on their gowns.

During the inflation period much comment was caused in society and former court circles when it was reported that the British royal family was going to order with von Drell, and the London fashion shops started a big protest.

The Baron, who before the war conducted shops also in New York, Vienna, Paris and London, insisted that his clients of distinguished families should be known to him, and he refused to let his liabilities exceed his assets.

Facing Another Problem

Railways Trying to Safeguard Autolites At Grade Crossings

Railway travel has been made so safe that the problem facing the steam roads is not that of protecting passengers and employees, but of safeguarding the occupants of automobiles at grade crossings, said Carl B. Gray, of Omaha, president of the United States Railway Association, at the annual meeting of the national safety congress at Cleveland. "The railroads have become vitally concerned about grade crossings," he said, "because of the injury and death to motorists, but because of the danger that such accidents may entail trains," he said.

Pure-Bred Poultry

Evidence that Manitoba farmers are becoming more and more interested in pure-bred poultry is demonstrated in the fact that in a recent car shipment of poultry loaded at Brandon by the Manitoba Co-operative Poultry Marketing Association in conjunction with the Dominion livestock branch, a very pure-bred hen of the Rhode Island Red variety was included.

Milford Amusement Tax

For the fiscal year ending October 31, 1925, the province of Ontario will have increased its revenue by approximately \$1,470,000 from the provincial amusement tax. This is \$7,000 lower than 1924.

The United States contains about 15,000,000 persons of foreign birth.

 - 9—Afternoon luncheon.
 - 10—Ground cover.

The Causation of Cancer

Answer to Last Week's Puzzle

Faulty Diet Largely Responsible For This Ailment

Much public interest has manifested itself regarding the cause of cancer, and the cause of this disease is a fact that to primitive races leading primitive lives cancer is unknown.

With the advance of civilization, and the knowledge of thousands of centuries having been added to normal health by the administration of certain assimilable potato salts. Dr. Robert Sill, M.D., F.R.C.S., etc., for many years the leading cancer surgeon of Europe, prominently relinquished the extremely lucrative part of his practice which he demonstrated by his own experience that cancer is a blood disease resulting from refined and faulty diet which deprives its consumers of the vital principle essential to disease, and distance and health preservation.

In recent years, the English press has frequently drawn attention to the phenomenal success attending the treatment of the "deadly disease," in connection with hygienic food, and the fact that cancer is a blood disease resulting from refined and faulty diet which deprives its consumers of the vital principle essential to disease, and distance and health preservation.

In recent years, the English press has frequently drawn attention to the phenomenal success attending the treatment of the "deadly disease," in connection with hygienic food, and the fact that cancer is a blood disease resulting from refined and faulty diet which deprives its consumers of the vital principle essential to disease, and distance and health preservation.

So long, however, as only the most refined and purest of the food is used, and the diet is not supplemented with the assimilable potato salts, the disease will continue to exist, and the death rate will remain high. The death rate from cancer and other self-inflicted diseases is now so high that it is estimated that in the United States alone, the death rate from cancer is now the highest of any disease, and the death rate from cancer is now the highest of any disease, and the death rate from cancer is now the highest of any disease.

Boy Immigrants

Pian Meets With Good Success in Alberta

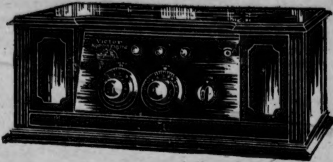

Discussing the "Healthy Boy Immigrant" plan, the Hon. J. G. Macdonald, minister of agriculture in Alberta, said: "Last year we brought out to Alberta 10 boys and this year we are bringing out 100 from the Old Country. Last year yielded one failure only. This year the boys' parents were so good in putting up capital money to pay the cost of preliminary education, that the boys themselves will be distributed among the agricultural colleges of the province and not kept exclusively at Vermilion."

Why have so many people the faculty of finding out things that are none of their business?

The seventh part of a grain of pure radium emits three million electric particles in one second.

billiards a fine aftermeal exercise

AS a mild form of exercise after lunch or after dinner, billiards cannot be excelled. Billiards brings into play practically every muscle of the body. The bending, twisting, leaning and stooping required to make various shots is a wonderful aid to digestion.

Equipped with Brunswick tables and accessories—the world's finest billiard equipment—our recreation room offers excellent opportunities for the enjoyment of this most fascinating game.

Come in during lunch hour and try billiards. Note the wonderful relaxation that even one short game will give.

Wins Distinction

JOSEPH COOPER

12-year-old son of Mr. and Mrs. H. J. Cooper, who won the governor-general's bronze medal for obtaining the highest marks in the June entrance examinations, in Calgary. He received his training in the first seven grades at Oyen public school.

Besides winning the governor-general's medal, Joseph captured the Foote trophy and the R. B. Bennett scholarship. The Foote is awarded to the pupil gaining the highest marks. The governor-general's medals are given one to each of the highest girls and highest boys in each inspectorate. The R. B. Bennett scholarships go to the highest boy and highest girl.

Cleopatra Enxix Wins Governor General's Bronze Medal

Cleopatra Enxix, grade eight student at Oyen public school, won the governor-general's medal for obtaining the highest marks in this school inspectorate. Of the 27 medals awarded in the province of Alberta, 17 were won by girls and 10 by boys.

Mr. and Mrs. George A. Morrison and "Jiggs" who have been spending a holiday in Toronto returned to Oyen this afternoon making the trip by motor.

Laflin W.I. will serve a chicken supper and afterwards give a dance on Friday, October 30.

Oyen School District, No. 3058 NOTICE

Ratepayers in the above school district are reminded that a discount of 5 per cent will be allowed on all current taxes, paid on or before October 31. Take your discount and assist in financing the school. No discount allowed after this date.

Canadian Apples For The Old Country

The crop of Canadian apples this year is better than ever, and what could be a more delightful remembrance from this side to our friends across the seas than a box of hand picked and hand packed Canadian apples. Your grocer can fill such an order and the Canadian National Express will transport and deliver by quick service, to any station in Great Britain or Ireland, from Montreal or Quebec up to November 15, and from Saint John, N.B. and Halifax, thereafter, at the rate of \$3.00 per standard box of apples not exceeding one cubic foot eight inches in measurement or fifty pounds in weight. Rate includes refrigeration on steamships. Consult any Canadian National Express Agent as to further particulars.

*Advice is
not always cheap*

WHEN it concerns investments, advice may often prove very expensive.

If farmers went to a bank for investment advice instead of some inexperienced friend—if they knew how willing banks are to help people invest safely and profitably—millions of dollars would be saved each year.

In considering your next investment see the branch manager of the Bank of Toronto.

A Bank of Toronto manager is always glad to give advice—based not on guesswork or hearsay, but on investigation and facts.
